Education

University of Oklahoma

Norman, OK

M.S. in Computer Science, expected December 2026

B.S. in Computer Science, May 2026 · GPA: 4.0

Minors: Mathematics and Electrical & Computer Engineering · Certificate: Data Science & Analytics

Technical Experience

GeoSafe, Software Engineering Intern

May 2026 – August 2026

- Co-designed a public-safety CAD platform on a two-developer team, defining its event-sourced data model and command/query architecture; refactored the backend using Clean Architecture.
- Independently designed and built a JSON-driven form platform defining schemas, UI layouts, and validation rules once; implemented iOS and web renderers.
- Shipped Android Auto and refactored the production Android app, resolving defects and improving maintainability.
- Replaced developer-machine deployments with GitHub Actions CI/CD, automated tests, and isolated testing/production environments, improving release security and iteration speed.

ConocoPhillips, Application Development Intern

May 2025 – August 2025

- Re-architected an assistant for well engineers evaluating joint-venture drilling proposals, consolidating .NET API and Azure Function orchestration into a modular Python service.
- Migrated LLM orchestration from Semantic Kernel to LangGraph; built routing, SQL, and context-rewriting tools grounded in internal data, plus a ReAct analytics prototype.

Inventory Ally, Software Developer

August 2024 – Present

- Developed and deployed an Azure RAG system mapping veterinary services to consumed inventory, reducing manual work by up to two hours per hospital weekly and enabling automated replenishment.
- Fine-tuned and deployed a DETR pill-counting model with image slicing and stitching for high-resolution mobile inputs.

ConocoPhillips, IT Audit Intern

May 2024 – August 2024

- Built a multithreaded Python pipeline with SailPoint APIs to collect enterprise access data and accelerate access-review audits.

Price College of Business, Student Programmer

June 2023 – Present

- Built a Power App for real-time laptop tracking, automated return reminders, and usage analytics.

University of Oklahoma, AI/ML Club President

April 2025 – May 2026

- Led a 17-member executive team serving 270+ members across education, outreach, marketing, and finance.
- Led hands-on workshops on PyTorch CNNs, data wrangling, Python environments, and local LLMs with Ollama.

Skills

Languages: C#, Python, TypeScript/JavaScript, Kotlin, Swift, C++, SQL

Frameworks & ML: .NET/ASP.NET Core, React, FastAPI, PyTorch, scikit-learn, LangGraph

Cloud & Data: Azure, AWS, PostgreSQL, Elasticsearch, Docker, Git, GitHub Actions, Terraform

Selected Publications

[ICWSM 2025](#) · [ACM CODASPY 2025](#) · [arXiv preprint 2024](#)

Awards/Certifications

Microsoft Azure Fundamentals; Microsoft Azure AI Fundamentals; Mendix Rapid Developer

Hacklahoma: Built on Ethereum Award (2025); 2nd Place (2024, 2023)

OU AI Symposium: 1st Place (2024, 2023); AGRI AI Competition: 3rd Place (2024)
